

## The Stereo Times 2007 Most Wanted Components Award

**Audio Acoustic Sapphire Ti-C SE Tuned loudspeakers** (Made in the UK - \$85,000 retail w/ ceramic tweeter)

Wow, talk about sound that is precise and magical - these speakers, sporting a special ceramic tweeter, are truly in another league with sound that comes to you pure and natural. Mated with top quality electronics and their incredible companion cables, be prepared for nothing less than the very best that music has to offer. In addition, the attention to detail is absolutely outstanding. These speakers provide a look and feel similar to that of an expensive luxury vehicle

(ala Rolls Royce no less). Yes, these speakers darn near cost just about what that wonderful car costs but that's a whole different story. What we're talking about here is how good they sound. Just make sure to take the time required to get their placement right. Once this is done, you're in for a real treat. Clean, clear, and layered with musical textures, these speakers are wonderfully neutral, with minimal variation from purity. Expensive yes, but oh so very, very addictive. [Bill Wells]

Stock gear sounds Flat and Dull.
